

Genetic Traits Inheritance Survey

Hi all! As part of my college project, I'm doing a small, in-family survey about the our family's genetic traits and how they're passed down from generation to generation. I request you to be a part of this survey and enjoy it with your family. Please ask your family members to observe those traits that are visually inaccessible to you. In case you're unsure about a particular trait, please select the "I'm not sure" option and personally send me the photo of your trait if possible. All the traits mentioned are neutral (non-discriminating, non-disease causing), hence I would plead you to take the survey in good spirit.
